Lexis and Grammar Conference 2007  
The 26th International Conference on Lexis and Grammar  
October 2-6, 2007

Invited speakers: S.-Y. Kuroda, M.-J. Dalbera

Submission deadline: April 8, 2007

The 26th International Conference on Lexis and Grammar will take place in Bonifacio, Corsica, on October 2-6, 2007.

The Conference welcomes innovative papers on the formal description of languages, as well as on the construction, management and use of language resources, including manually constructed lexicons and grammars. In addition, it aims at bringing together linguists and computer scientists.

The Conference will combine a general session and a thematic session.

The thematic session of the 26th International Conference on Lexis and Grammar will focus on SMSes (text messaging) and internet texts, including, but not limited to:

- SMSes (mobile phone text messages),

- emails, blogs and forums,
- wikis,
- texts published without reviewing.

Submissions for the general session may address any of the usual topics of the Conference:

- predicate-argument structures,
- the interface between lexis and grammar,
- exploitation of language resources (including manually constructed lexicons and grammars) for language processing (including information retrieval, information extraction, parsing),
- language resources concerning lexis or grammar.

The languages of the Conference are English and French.

Submission information can be found on the web site.

The papers presented at the Conference will be available in Proceedings on the first day.
